## RAPID ANALYSIS & DIAGNOSTICS

**RME2026** – the 16th conference in the Rapid Methods Europe series – is dedicated to innovations and breakthroughs in rapid analysis & diagnostics across the agri-food, water, animal health, healthcare, and forensic science sectors. The conference aims to further strengthen the academia-industry relations and disseminate advanced research towards practical applications. From concept to product, from analytical methods to systems, and from laboratory to on-site testing are the main themes of **RME2026**.

This 16th edition will focus again on the technology rather than the sector, aiming to bring together scientists with different expertise with the possibility of cross-fertilizing each other and to develop new views and applications. Technologies include, but are not limited to (bio)sensors (electrochemical, optical, photonic), DNA/RNA-based methods, paper-based detection methods, microfluidic/nano/quantum devices, functional bioassays, spectrometry, and spectroscopy for rapid analysis & diagnostics of pathogenic and spoilage bacteria, viruses, chemical contaminants, allergens, antimicrobial resistance, substances of emerging concern, etc.

**RME2026** is aimed at a wide range of scientists, technologists, and professionals wishing to gain insight into innovations and breakthroughs in rapid analysis & diagnostics. Attending the conference is an invaluable opportunity for laboratory managers and technicians, food safety and quality assurance/quality control managers, technical managers, healthcare professionals, veterinary diagnosticians, plant science and agronomy scientists, environmental (water) scientists, forensic researchers, and others interested in rapid analysis & diagnostics.

## WHY BEING A SPONSOR?

Reasons why being a sponsor of **RME2026** is a good marketing strategy:

- Communicate your message to a highly qualified scientific and expert audience in the era of rapid analysis & diagnostics
- Increase visibility in focused markets
- Highlight your company's expertise
- Generate new sales leads
- Network with specialists
- Build new partnerships
- Find out about new research being undertaken
